

New York
Friday evening.

My dear Doctor

I find by my
London letters that your
beautiful & elaborate volume
has already attracted the notice
of the most distinguished English
Protestants - Dr. Booth says

"I have just received Gray's
generous & am highly honoured
by his dedicating the Vol. to me.

It is admirably done" -
and afterwards remarks

"Brewer too was here, speaking
highly of Gray's beautiful volume
Commendation from such a
Quarter is worth something, &
not easily obtained - Yours

Francis
Dr. A. Gray

own letters will probably have
informed you of the welcome recep-
tion of your "genera" in Europe
but I take the opportunity of sending
you the above short extracts from
mine - As we shall so soon
meet, I shall reserve all I have
to say on Botanical matters,
I only beg my best respects to Dr. Gray.

Yours Dr. DeCade
Yrs. very truly
Geo. Caley

Prof. A. Gray
